

Urwah Siddiqui

Backend Development | DevSecOps | Application Security

Karachi, Pakistan · Email: urwahsiddiqui6@gmail.com

LinkedIn: linkedin.com/in/urwah-siddiqui · GitHub: github.com/UrwahSiddiqui

Professional Summary

Cybersecurity graduate with practical backend, infrastructure and security experience: FastAPI services, database migrations, Linux hardening, Docker deployments, monitoring and incident investigation. Documents validation, remediation and rollback to support reliable delivery.

Technical Skills

Backend & Data: Python, FastAPI, PostgreSQL, MySQL, SQLite, Redis, API security

Infrastructure & Delivery: Linux, Bash, Docker, Docker Compose, Nginx, HTTPS/TLS, SSH, UFW, iptables, Git/GitHub, CI/CD, Jenkins fundamentals

Security & Monitoring: Prometheus, Grafana, Alertmanager, Node Exporter, AWS

IAM/CloudTrail/CloudWatch/SNS, OWASP, Burp Suite, ZAP, Nmap, Wazuh and Splunk fundamentals

Professional Experience

DevOps & Cybersecurity Engineer · Zyne Ventures

June–August 2026 · Karachi, Pakistan

- Hardened Linux, Nginx, SSH and firewalls across production and staging; enforced HTTPS, security headers and restricted service access.
- Implemented Prometheus, Grafana, Alertmanager, Node Exporter and SSL-expiry alerts across four servers for resource, availability and certificate monitoring.
- Investigated compromised websites, outages and abnormal resource activity using system, application and web-server logs; restored services and documented corrective actions.
- Migrated SQLite and MySQL databases to PostgreSQL; reconciled source and destination records for data integrity.
- Secured Dockerized services behind Nginx and HTTPS with restricted database connectivity.
- Created deployment, validation, remediation and rollback SOPs and Jira records for repeatable handover.

Selected Projects

Offline Payment System | September 2025–May 2026

Team project · Backend, application security & DevSecOps contribution

Contributed Dockerized FastAPI, PostgreSQL and Redis services; implemented MFA/OTP, JWT, RBAC, AES-256, RSA-PSS signatures, audit logging and hash-chained offline records. Tested authentication, authorization and transaction workflows.

Secure SDLC & Web Application Security Assessment | May 2026

Modelled threats and assessed applications with OWASP Threat Dragon, Burp Suite, ZAP, Postman and Nmap; documented evidence, severity and remediation.

AWS Security Monitoring & Alerting Lab | April 2026

Configured IAM, CloudTrail, CloudWatch filters and SNS alerts for failed logins, EC2 launches, root activity, privileged IAM actions and logging-stop attempts.

Education

BS Cyber Security · 2022–2026 · CGPA: 3.02

FAST – National University of Computer & Emerging Sciences

Selected Achievements

- Rector's List – 1st Position (Spring 2026)
- 1st Position – TechnoFest CTF (2024 & 2026); IntraFAST CTF
- 1st Position – PCC Ideas Cup (2025); Regional Finalist – National AI Competition (2025)
- Represented FAST-NUCES at Pak-Crypt International Symposium (2025)

Certifications and Training

Completed: Google Foundations of Cybersecurity; Google Play It Safe; TryHackMe Pre-Security

Job simulations: Deloitte Cyber; Mastercard Cybersecurity; Commonwealth Bank Introduction to Cybersecurity

In progress: Google DevSecOps
